That is
CORRECT, Great
Job!!!

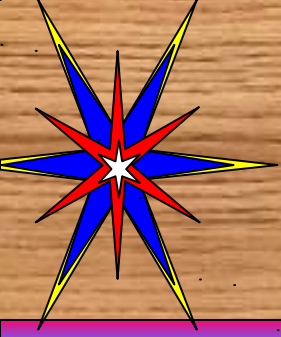

Check Point

**Sorry, but you are
incorrect.**

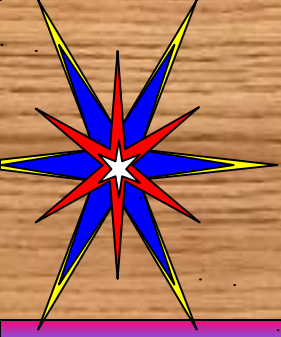

Introduction to Biochemical Testing

- ▮ **Biochemical testing within the military is defined as the chemical analysis of urine for specific drugs or the analysis of breath or blood for alcohol.**

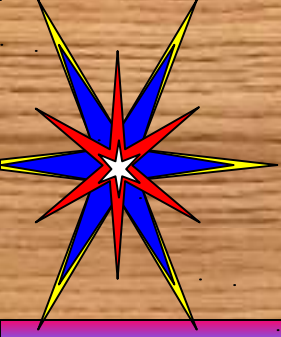

Introduction to Biochemical Testing

- ▮ Biochemical testing is used to:**
 - ▮ Deter Soldiers from abusing drugs (including illegal drugs, other illicit substances and prescribed medication).**
 - ▮ Facilitate the early identification of alcohol and/or other drug abuse.**
 - ▮ Enable commanders to assess the security, military fitness, good order and discipline of their units.**

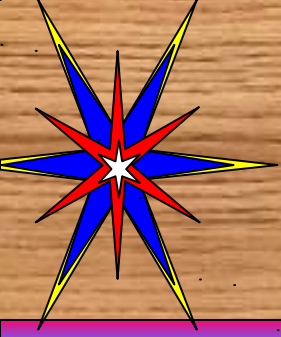

Regulatory Guidelines

- ▮ **Primary guidance for the Biochemical Testing Program comes from:**
 - ▮ **AR 600-85 - Army Substance Abuse Program (ASAP)**
 - ▮ **DoD Directive (DoDD) 1010.1 - Drug Abuse Testing Program**
 - ▮ **DoD Instruction (DoDI) 1010.16 - Technical Procedures for the Military Personnel Drug Testing Program**

Requirement for Testing

- ▣ **Annual Testing per AR 600-85 chapter 7.**
 - ▣ **Aviation personnel.**
 - ▣ **Nuclear/Chemical Personnel Reliability Program.**
- ▣ **Note: MPs were erroneously removed from the regulation; may be added in a change to the regulation. Check with your local ASAP to see if it is still a local requirement.**

Types of Testing

▮ COMMANDER DIRECTED.

- ▮ **Probable Cause (PO)** - Commander has sufficient evidence to believe that if he/she tests the Soldier that the Soldier will be positive. Commander should always check with the local SJA before ordering this test.
- ▮ **Command Direct (CO)** - Also known as a Competence/Fitness for duty. The Commander believes the Soldier is on a drug because of unusual or bizarre behavior. The commander orders a test to ensure the safety of the Soldier and his/her coworkers.
